

COVID-19 Safety Notice

Here at Hutchinson Family Dentistry, the health and safety of our team and patients is our top priority, which is why we are doing whatever we can to help prevent the spread of the virus. On top of our already thorough cleaning and sterilization techniques, we have taken a few additional infection control measures: clinical staff now also wear protective gowns and face shields, all staff check their temperatures each morning, the waiting room has been social distanced, patients are screened and have their temperature taken when they come in, and air purifiers with hospital grade H13 HEPA filters have been installed in each room.

If you or anyone you have had contact with have tested positive for COVID-19, been told to quarantine, or developed any known symptoms of the Coronavirus, we kindly ask that you call to reschedule your appointment. Potential symptoms include but are not limited to fever, chills, loss of taste or smell, cough, difficulty breathing, or other respiratory symptoms.

When you come for your appointment, please practice social distancing in the waiting room and keep your mask on until we take your temperature. Thank you!
